

## **Where is McDonald's? Transversal Task**

In the town of Polaris, there are only 3 roads because the town is so small. Two of the roads are parallel and the third road intersects the parallel roads. Draw a map of the roads and the 8 buildings with the following conditions:

- 1) The Cyber Café is alternate interior to the Extreme Sports Store.
- 2) Rite Aid is corresponding with Starbucks.
- 3) The Post Office is vertical to the Extreme Sports Store.
- 4) The Bank is alternate exterior to the Post Office.
- 5) The Waffle House is consecutive interior (same side interior angles) with the Cyber Café.
- 6) Where is McDonald's?

Is there more than one way to draw the map? Explain.
